

Program SLOs

Emergency Medical Technology

Certificate of Proficiency – Emergency Medical Technician

Program Student Learning Outcomes From the 2005 PrOF (Program Review)

P-SLO 1 Have student complete and pass the State’s EMT Certification Written Exam to achieve EMT certification.

P-SLO 2 Provide the students with the current information they need to work in the field of emergency medicine.

P-SLO 3 Have students learn and perform the skills and tasks required for this challenging field.

P-SLO 4 Teach and foster professional values and standards for medical personal that the industry requires.

Certificate – EMT Student Learning Outcomes*

SLO 1 Demonstrate and confirm knowledge of current information they need to work in the field of emergency medicine as an EMT. The students will be able to analyze fluid complex medical problems with patients and then apply appropriate patient care based on a standardized decision making process. Perform the skills and tasks of patient care and demonstrate proficiency on the basic equipment that EMTs use in the field. Demonstrate critical thinking techniques and how to apply them to sick and injured patients in the pre-hospital arena.

SLO 2 Demonstrate and incorporate professional values and standards for medical personal that the industry requires in pre-hospital emergency medicine. Implement and maintain professional appearance and conduct in all aspects of program activities. Perform patient assessment and care utilizing a team approach.

SLO 3 Achieve the basic educational requirements for most paramedic programs in the state and country. Most paramedic programs will require at least 1 year work experience as an EMT on an ambulance as an application requirement for Paramedic school. Students will work in field clinical setting with experienced medical professionals and will apply skills and knowledge learned in the program. Students will complete and pass the State’s EMT Certification Written Exam to achieve EMT certification. Students will utilize recently learned skills and knowledge and comprehend the need for EMTs to stay current on the most up to date emergency medical information and training.

* Developed through the Curriculum Committee review process
