**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

HHS poverty guidelines were used in defining the poverty level. Poverty guidelines are the administrative version of poverty measures issued by the Department of Health & Human Services (HHS); they are a simplification of the poverty thresholds established by the U.S. Census Bureau and are used in determining financial eligibility for certain federal programs. The U.S. Census Bureau defines low income as at or below 200% of poverty. Middle income or higher is defined by the highest income category for which data are collected by LRCCD, which was \$40,000 or higher through Fall 2001 and \$60,000 or higher beginning Fall 2002 and thereafter. Lower LRCCD income categories are also classified as middle for small families (varies by HHS criteria established for each calendar year).

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

HHS poverty guidelines were used in defining the poverty level. Poverty guidelines are the administrative version of poverty measures issued by the Department of Health & Human Services (HHS); they are a simplification of the poverty thresholds established by the U.S. Census Bureau and are used in determining financial eligibility for certain federal programs. The U.S. Census Bureau defines low income as at or below 200% of poverty. Middle income or higher is defined by the highest income category for which data are collected by LRCCD, which was \$40,000 or higher through Fall 2001 and \$60,000 or higher beginning Fall 2002 and thereafter. Lower LRCCD income categories are also classified as middle for small families (varies by HHS criteria established for each calendar year).

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

Data for "Unemployed" and "Not Seeking" categories were not collected from all students until Fall 2005, hence no comparisons can be made between data collected prior to and after Fall 2005.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

Data for "Unemployed" and "Not Seeking" categories were not collected from all students until Fall 2005, hence no comparisons can be made between data collected prior to and after Fall 2005.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

Evening classes include classes beginning at 4:30pm or later; weekend classes are also categorized by the time of day they begin.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

Evening classes include classes beginning at 4:30pm or later; weekend classes are also categorized by the time of day they begin.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

Education Initiative student enrollment includes high school graduates or the equivalent, who are 20 years old or younger, as well as any non-high school graduates, 18-20 who are capable of benefiting from the education that is offered. UC Davis First-Time Freshmen who take only their first (and possibly second) quarter remedial coursework through SCC are excluded from this analysis.

**Source:** Los Rios Community College District End of Semester Research Database files. Students who dropped all of their courses prior to the deadline have been excluded.

**Technical Notes:**

\* See Report Header for technical notes.

\*\* Persistence data are not reported when less than five students were enrolled in the Fall semester.

Persistence reflects the rate by which students who enrolled in the Fall re-enrolled in the Spring. Note that students who do persist at a Los Rios college other than the one where they were enrolled in the Fall semester are captured in the LRCCD Composite data, only. As such, district-wide persistence rates are often higher than the rates of each of the four colleges. Students change colleges for many reasons -- for specialized courses, programs offered only at a different college or a college's proximity to work or to home upon moving, to name a few.

High School graduates enrolled at LRCCD colleges: Those students ages 19 and younger, who received a high school diploma in the year specified.
