CalWORKs Students:

1. CalWORKS students, beginning with the spring 2014 term, are for the first time eligible for the earliest priority to register for classes at any of the four Los Rios colleges.

2. CalWORKS students who had enrolled in Los Rios college courses prior to spring 2014 are strongly encouraged to complete orientation and assessment and, with a counselor, develop a student education plan, to aid them along their path to student success.

3. The “Steps to Success” tab in eServices will show the status of your completion of these three steps to success – Orientation, Assessment and Developing a Student Education Plan.

4. Beginning with the summer/fall 2014 terms, all students – including CalWORKS students – who have earned a combined 90 degree-applicable units at the Los Rios colleges will no longer be eligible for the earliest priority to register for classes (excluding non-degree applicable ESL classes or basic skills courses numbered below 100, such as MATH 20, ENGWR 51, etc.). All students who reach 90 units earned must wait for the last – or open – registration period to enroll in classes.

5. Also beginning with the summer/fall 2014 terms, all students who are placed on academic and/or progress probation for two consecutive primary terms (spring for fall) will not be eligible for the earliest priority to register for classes at their next registration opportunity.
