From Estuaries to the Deep Sea…

If you are considering graduate study or a professional career in the marine sciences, developing research skills through hands-on experience is one of the most valuable learning opportunities you can have. This summer, Oregon State University will offer 20 students from all over the U.S. the opportunity to work with faculty mentors on research projects that advance knowledge and understanding of marine, coastal and estuarine environments.

The Research Experience for Undergraduates program runs from June 17 to August 23, 2013 at the Hatfield Marine Science Center (HMSC) in Newport and at the College of Earth, Oceanic and Atmospheric Sciences in Corvallis.

Eligibility
Currently enrolled undergraduates who have by June 2013 completed at least two years of coursework may apply. (Eligibility limited to U.S. citizens and permanent residents)

REU interns receive a weekly stipend, housing on-site, and round-trip transportation from their home area.
