

Program SLOs Health Education

A.S. Degree – Health

Program Student Learning Outcomes From the PrOF (Program Review) 2015 Update

1	Program Student Learning Outcome (P-SLO)	(Health) Validity	Demonstrate an understanding of the process of determining the validity of health and wellness information using the scientific method and the relationship between scientific research and established knowledge.
2	Program Student Learning Outcome (P-SLO)	(Health) Self-directed learning skills	Utilize knowledge to become a self-directed learner who has a foundational knowledge of health promotion and disease prevention and can grow in this knowledge by gathering, analyzing, and applying accurate health information as their needs change through life.
3	Program Student Learning Outcome (P-SLO)	(Health) Motivational Techniques	Understand motivational techniques and apply them to enable the student to create lifestyle changes in health.
4	Program Student Learning Outcome (P-SLO)	(Health) Health Management	Become a responsible, productive citizen who avoids behaviors that place his or her health or that of others at risk, and so, reduce the physical, emotional, and economic costs to themselves and to their community.

A.S. Degree – Health Education – Student Learning Outcomes*

SLO 1: Apply and understand principles and knowledge related to Health, Biology, Psychology, and other sciences toward a career path in the Health field, or to their own personal wellness.
