Program Student Learning Outcomes From the 2015 PrOF (Program Review) Update

1	Program Student Learning Outcome (P-SLO)	Synthesis	Program will provide an academic environment where multiple disciplines (i.e., history, art appreciation, music appreciation, and philosophy) are synthesized. Use the interdisciplinary nature of Humanities courses to facilitate college level proficiency in critical thinking and writing.
2	Program Student Learning Outcome (P-SLO)	Cross-cultural links	Program will emphasize cross-cultural links between multiple Humanities disciplines, emphasizing commonalities of human expression between different cultures and shared ideas about the human experience. The Humanities program will organize events on the CRC campus to encourage cultural literacy and understanding campus wide.
3	Program Student Learning Outcome (P-SLO)	Cultural Proficiency	Foster a greater understanding and tolerance of cultures other than the students own by exposing the student to artistic materials not form their own culture or time period. Enhance the student's appreciation of the Humanities in their everyday experience.
